

Pandian D

Software Engineer - Fullstack

📞 6380429824 ✉️ pwgpdandian@gmail.com 📍 banglore tn ,india [in LinkedIn - Pandian D](#) [Github - Pandian D](#)

SUMMARY

Experienced and adaptable Software Engineer with a strong foundation in full-stack development, Generative AI, and modern web technologies. Proven ability to design and build scalable, secure, and high-performance applications using technologies like React.js, Node.js, MongoDB, and AI tools such as Claude, OpenAI APIs, and LangChain. Skilled in integrating AI-driven features, RESTful APIs, and real-time systems to enhance user experience and application efficiency. Adept at collaborating across teams, optimizing development workflows, and delivering impactful solutions in fast-paced environments. Passionate about leveraging cutting-edge AI technologies to solve real-world problems and continuously improve software performance.

EXPERIENCE

Software Engineer – Full Stack Developer

Thots2IT Technologies August 2023–2025

Enterprise Application Development |FINX Banking, ERP, CRM

- Developed and contributed to multiple enterprise-grade applications including banking software, ERP systems, CRM solutions, and school management platforms, delivering scalable and high-performance full-stack solutions.
- Worked extensively on the FINX Nidhi Banking Software, implementing modules for deposits, loans, accounting, and MIS reporting, ensuring secure financial transactions and efficient multi-branch data consolidation. Designed and optimized backend workflows to handle real-time financial operations with high reliability and data integrity.
- Built and enhanced ERP systems by developing modules for sales, inventory management, customer relationship management (CRM), human resource management (HRMS), and financial accounting. Implemented RESTful APIs using Node.js and Express.js to enable seamless communication between frontend and backend systems. Focused on scalable architecture design and efficient data handling to support complex business operations across multiple departments and locations.
- Developed CRM solutions to streamline lead management, workflow automation, and reporting processes. Implemented role-based access control and user privilege management to ensure secure and structured data access. Integrated features for data import, analytics dashboards, and automated task assignment, improving operational efficiency and decision-making capabilities.
- Worked on School Management Software (SMS), building modules for student information systems, attendance tracking, examination management, and report generation. Designed user-friendly interfaces using React.js and ensured secure data handling with proper authentication and authorization mechanisms. Enabled automation of academic and administrative workflows, reducing manual effort and improving system efficiency.
- Implemented end-to-end full-stack development using React.js for frontend and Node.js, Express.js for backend, with MongoDB and SQL databases for data management. Applied modern development practices including modular architecture, clean code principles, and performance optimization techniques. Collaborated in Agile environments, contributing to sprint planning, feature development, testing, and continuous system improvements to ensure scalability, maintainability, and high system performance.

CERTIFICATIONS

- Full Stack Development
- Web Security & Authentication
- Cloud & Deployment
- Database Management

EDUCATION

Bachelors Of Computer Science

SRM INSTITUTE OFSCIENCEANDTECHNOLOGY

Aug 2020 - May 2023

TECHNICAL SKILLS

- Programming Languages: Python, java
- Frameworks & Libraries: Spring Boot, FastAPI, LangChain, Hugging Face Transformers, Streamlit, Robot Framework
- Backend & APIs: Spring Boot (Microservices), REST APIs, Node.js, Express.js, Authentication & Secure APIs
- AI/ML & LLM: OpenAI API, Ollama, vLLM, Embeddings, RAG, Prompt Engineering, Vector DBs
- Databases: SQL, MongoDB, ChromaDB, Supabase
- Deployment & Serving: OpenShift AI, Kubeflow, Triton, vLLM, Docker, Podman
- DevOps Tools: GitHub Actions, Jenkins, Nginx, Git, GitLab, GitHub
- Cloud & Infra: OpenShift, Kubernetes, AWS (Basic), Azure, NVIDIA/AMD GPUs, Intel Gaudi
- Testing: Robot Framework, Unit Testing (Java/Spring Boot, Go/Python, Pytest)

PROJECTS

LLM-Based AI Development Assistant

Claude AI Powered Development

Python | Claude AI | LLM APIs | Docker | GitHub

Actions | AWS EC2 | CI/CD Automation | Bash

- Designed and implemented an end-to-end CI/CD pipeline
- Developed a personal AI-powered development assistant using Claude AI and LLM APIs to improve coding productivity and automate software development workflows including code generation, debugging, and system design support.
- Built prompt engineering workflows to optimize LLM responses for real-world engineering tasks and improve development efficiency. Implemented AI-driven automation to streamline workflows and enhance full-stack development productivity.
- Enabled faster decision-making and reduced development time by integrating intelligent AI assistance into everyday engineering tasks.

Doctor Appointment Booking System

[DoctorOnCall]

Tech Stack: MERN MongoDB, Express.js,

React.js, Node.js | JWT | Tailwind CSS

- Developed a full-stack Doctor Appointment Booking System enabling real-time scheduling and patient-doctor interaction. Built RESTful APIs using Node.js and Express.js for managing users, doctors, and bookings.
- Created a responsive React.js frontend for seamless appointment booking and doctor search. Integrated MongoDB for scalable data storage and efficient transaction handling.
- Implemented JWT-based authentication and role-based access control to ensure secure and structured system access.
